List of Contents

NUMBER 1

Y. Shindo, K. Watanabe and **F. Narita**	1	Electroelastic analysis of a piezoelectric ceramic strip with a central crack
S. Vidoli, R. C. Batra and **F. dell'Isola**	21	Saint-Venant's problem for a second-order piezoelectric prismatic bar
Y. Ootao and **Y. Tanigawa**	47	Three-dimensional transient piezothermoelasticity for a rectangular composite plate composed of cross-ply and piezoelectric laminae
N. Phan-Thien and **D. C. Pham**	73	Differential multiphase models for polydispersed spheroidal inclusions: thermal conductivity and effective viscosity
M. Gulgec and **Y. Orcan**	89	Elastic-plastic deformation of a heat generating tube with temperature-dependent yield stress
M. A. Ezzat and **M. I. Othman**	107	Electromagneto-thermoelastic plane waves with two relaxation times in a medium of perfect conductivity

NUMBER 2

S. Das, B. Patra and **L. Debnath**	121	Stress intensity factors around two co-planar Griffith cracks in an orthotropic layer sandwiched between two identical orthotropic half planes
E. T. Enikov and **J. G. Boyd**	135	A thermodynamic field theory for anodic bonding of micro electro-mechanical systems (MEMS)
R. Bajaj and **S. K. Malik**	159	Magnetic fluid systems of finite geometry with surface adsorption
M. E. Erdoğan	175	Flow induced by non-coaxial rotation of a disk executing non-torsional oscillations and a fluid rotating at infinity
C. Méchain-Renaud and **A. Cimetière**	197	Influence of a curvature discontinuity on the pressure distribution in two-dimensional frictionless contact problems
E. M. A. Elbashbeshy	207	Free convection flow with variable viscosity and thermal diffusivity along a vertical plate in the presence of the magnetic field
S. Chakravarty, P. K. Mandal and **A. Mandal**	215	Mathematical model of pulsatile blood flow in a distensible aortic bifurcation subject to body acceleration
F. Wu, L. Chen, F. Sun and **C. Wu**	239	Finite-time exergoeconomic performance bound for a quantum Stirling engine
	249	Announcement

NUMBER 3

T. A. Khraishi, J. P. Hirth, H. M. Zbib and **M. A. Khaleel**	251	The displacement, and strain–stress fields of a general circular Volterra dislocation loop
D. Poliševski	267	Optimal quasiperiodic design for a heat transfer problem
F.-Y. Huang, B.-H. Yan, J.-L. Yan and **D.-U. Yang**	275	Bending analysis of micropolar elastic beam using a 3-D finite element method
T. Yokoyama and **K. Liu**	287	A numerical and experimental study of transient torsional waves in stepped circular bars
A. Kucaba-Pietal	309	Low-Reynolds-number flow of micropolar fluid between converging spheres
F. Ahmad and **A. Rahman**	325	Acoustic scattering by transversely isotropic cylinders
T. Hayat, S. Asghar and **A. M. Siddiqui**	337	Some unsteady unidirectional flows of a non-Newtonian fluid
D. S. Drumheller	347	On theories for reacting immiscible mixtures

NUMBER 4

R. Bhargava and **H. S. Takhar**	383	Numerical study of heat transfer characteristics of the micropolar boundary layer near a stagnation point on a moving wall
R. Artan and **M. Omurtag**	395	Two plane punches on a nonlocal elastic half plane
M. Kamiński	405	Homogenized properties of periodic n-component composites
A. I. Murdoch	429	On time-dependent material systems
J. F. Ganghoffer and **R. de Borst**	453	A new framework in nonlocal mechanics

NUMBER 5

B. Khuzhayorov, J.-L. Auriault and **P. Royer**	487	Derivation of macroscopic filtration law for transient linear viscoelastic fluid flow in porous media
A. S. Ashour	505	Wave motion in a viscous fluid-filled fracture
M. A. Murad and **J. H. Cushman**	517	Thermomechanical theories for swelling porous media with microstructure
Y. Z. Chen	565	Complex potentials and singular integral equation for curve crack problem in antiplane elasticity
A. Capatina and **R. Stavre**	575	Algorithms and convergence results for an inverse problem in heat propagation

NUMBER 6

J. M. Solberg and **P. Papadopoulos**	589	Impact of an elastic pseudo-rigid body on a rigid foundation
Y. Mikata	605	Determination of piezoelectric Eshelby tensor in transversely isotropic piezoelectric solids
K. Bucháček	643	Canonical forms of constitutive equations of mixtures
Q.-H. Qin and **Y.-W. Mai**	673	Crack branch in piezoelectric bimaterial system
M. H. Ilyasov and **A. Y. Aköz**	695	The vibration and dynamic stability of viscoelastic plates

NUMBER 7

E. S. Şuhubi	715	Explicit determination of isovector fields of equivalence groups for second order balance equations
S. Cleja-Ţigoiu	737	Nonlinear elasto-plastic deformations of transversely isotropic material and plastic spin
P. G. Siddheshwar and **S. Manjunath**	765	Unsteady convective diffusion with heterogeneous chemical reaction in a plane-Poiseuille flow of a micropolar fluid
H. M. Park and **Y. D. Jang**	785	Control of Burgers equation by means of mode reduction
M. Rahman and **G. Newaz**	807	Boussinesq type solution for a transversely isotropic half-space coated with a thin film
A. Mrabti, K. Gueraoui, A. Hihi and **O. Terhmina**	823	Effects of microstructure on natural convection flow of micropolar fluids in a vertical cylinder heated from below

NUMBER 8

Y. J. Kim	833	Unsteady MHD convective heat transfer past a semi-infinite vertical porous moving plate with variable suction
G. Caviglia and **A. Morro**	847	Wave propagation in multilayered anisotropic solids
P. Nardinocchi, L. Teresi and **A. Tiero**	865	A direct theory of affine bodies
L. Wu, J. Chen and **Q. Meng**	879	Two piezoelectric circular cylindrical inclusions in the infinite piezoelectric medium
B. L. Wang, J. C. Han and **S. Y. Du**	893	Fracture mechanics for multilayers with penny-shaped cracks subjected to dynamic torsional loading
P. A. Voltairas, D. I. Fotiadis and **C. V. Massalas**	903	Magnetization reversal in thin ferromagnetic films under mechanical stress

W. Mack and **M. Plöchl** 921 Transient heating of a rotating elastic–plastic shrink fit

N. A. Unverdi 939 The velocity field of second-order Rivlin–Ericksen fluid between two parallel porous plates rotating around two different axes but with the same angular velocity

NUMBERS 9–10

xi Preface

xiii Curriculum vitae of P.-G. de Gennes

xv Publications of P.-G. de Gennes

ERINGEN MEDIAL LECTURE

P.-G. de Gennes 957 Tentative reflections on powder mechanics

SESSION I – Monday 28 September 1998

A. C. Eringen 959 A unified continuum theory for electrodynamics of polymeric liquid crystals

J. Plewa and **T. A. Witten** 989 Twisting constraints in conventional polymers

T. Lodge 991 Structure and dynamics of block copolymer liquids

W. Helfrich 993 Measures of integration in the statistical mechanics of polymers and liquid crystals

SESSION II

D. Andelman, H. Diamant and **G. Ariel** 995 Dynamic surface tension and kinetics of surfactant adsorption at fluid interfaces

A. Windle 997 Polymers and liquid crystals: the parallel world of computational models

M. Schick 999 Ordered phases of block copolymers and lipids

E. T. Samulski 1001 Similarities in liquid crystals and entangled polymers

SESSION III

J. D. Schieber 1003 Using stochastic simulations to study the dynamics of polymer melts and liquid crystals

J. Dennis, J. Howard and **V. Vogel** 1005 Polymers, liquid crystals and molecular shuttles

M. C. Calderer and **C. Liu** 1007 Poiseuille flow of nematic liquid crystals

M. Kleman 1023 Liquid crystals and the physics of defects

R. D. Kamien 1025 Chiral mesophases of DNA

SESSION IV – Tuesday 29 September 1998

F. Brochard-Wyart, R. Fondecave and **M. Boudoussier** 1033 Wetting of antagonist mixtures: the 'leak out' transition

R. Shashidhar and **R. E. Geer** 1049 Surface-induced undulations in a liquid crystalline polymer

H. Finkelmann, P. Fischer, P. Stein and **P. Stein** 1057 Liquid single crystal elastomers (LSCE)

SESSION V

M. N. L. Narasimhan 1059 Thermomicropolar flow of a nematic liquid crystal in a flexible stenosed tube

M. Tirrell, G. Fields, E. Yu, S. Ochsenhirt and **T. Pakalns** 1075 Creating functional peptide architectures at interfaces

SESSION VI

T. Kosa, E. Weinan and **P. Palffy-Muhoray** 1077 Brownian motors in the photoalignment of liquid crystals

C. Rymarz 1085 Microstructural media in bundle space

V. Percec 1097 Liquid crystals. From synthetic goal to synthetic tool

H. R. Brand, P. E. Cladis and **H. Pleiner** 1099 Polar biaxial liquid crystalline phases with fluidity in two and three spatial dimensions

SESSION VII

M. C. Calderer and **C. Liu** 1113 Mathematical developments in the study of smectic A liquid crystals

R. Kotowski and **E. Radzikowska** 1129 Variational principle for dissipative processes in continuum physics

D. Kinderlehrer 1151 Remarks about the dynamics of the Fokker–Planck equation

NUMBER 11

E. Smith 1153 Normalised effective K versus L_r failure assessment diagrams as applied to a flaw in the vicinity of a stress concentration

M. Ali, T. Fujiwara and **J. E. Leblanc**	1161	Influence of main flow inlet configuration on mixing and flameholding in transverse injection into supersonic airstream
L. H. He and **J. H. Zhao**	1181	Evolution of stresses in composites with rigid inclusions during interface diffusion: a two-dimensional case
D. Bhardwaj	1197	Formation of shock waves in reactive magnetogasdynamic flow
J. H. Huang, H.-K. Liu and **W.-L. Dai**	1207	The optimized fiber volume fraction for magnetoelectric coupling effect in piezoelectric–piezomagnetic continuous fiber reinforced composites
X.-F. Li, T.-Y. Fan and **X.-F. Wu**	1219	A moving mode-III crack at the interface between two dissimilar piezoelectric materials
G. Chen, M. P. Coleman, D. Ma, P. J. Morris and **P. You**	1235	The fundamental solution for shallow circular cylindrical shells. Part I: derivations
G. Chen, M. P. Coleman and **P. J. Morris**	1259	The fundamental solution for shallow circular cylindrical shells. Part II: numerical computation and software
A. Chattopadhyay and **S. Saha**	1275	Corrigendum

NUMBER 12

M. R. Barone and **D. A. Caulk**	1279	Analysis of liquid metal flow in die casting
H. S. Takhar, A. J. Chamkha and **G. Nath**	1303	Flow and mass transfer on a stretching sheet with a magnetic field and chemically reactive species
R. Wang, K. Yasuda and **Z. Zhang**	1315	A generalized analysis technique of the stationary FPK equation in nonlinear systems under Gaussian white noise excitations
J. Murali Krishnan and **C. Lakshmana Rao**	1331	Mechanics of air voids reduction of asphalt concrete using mixture theory
S. Usha and **A. Ramachandra Rao**	1355	Effects of curvature and inertia on the peristaltic transport in a two-fluid system
R. Kumar	1377	Wave propagation in micropolar viscoelastic generalized thermoelastic solid

NUMBER 13

S. Krishnaswamy and **M. F. Beatty**	1397	The Mullins effect in compressible solids
H.-J. Ding, F.-L. Guo and **P.-F. Hou**	1415	A general solution for piezothermoelasticity of transversely isotropic piezoelectric materials and its applications
N. Antar and **H. Demiray**	1441	The boundary layer approximation and nonlinear waves in elastic tubes

Th. Seelig, S. Rafiee and **D. Gross** 1459 A simple method for the investigation of elastic bodies of finite size containing many cracks

P. Hillion 1473 Electromagnetic Magnus effect

M. Zidi 1487 Finite torsion and anti-plane shear of a compressible hyper-elastic and transversely isotropic tube

H. A. Erbay 1497 An asymptotic theory of thin micropolar plates

NUMBER 14

M. Shillor and **M. Sofonea** 1517 A quasistatic viscoelastic contact problem with friction

M. Cocu and **J.-M. Ricaud** 1535 Analysis of a class of implicit evolution inequalities associated to viscoelastic dynamic contact problems with friction

D. I. Fotiadis, G. Foutsitzi and **C. V. Massalas** 1553 Wave propagation in human long bones of arbitrary cross-section

H. S. Kit, M. V. Khaj and **O. P. Sushko** 1593 Investigation of the interaction of flat surface cracks in a half-space by BIEM

Z. Shi, J. M. Reese and **H. W. Chandler** 1617 The application of a shock wave model to some industrial bubbly fluid flows

NUMBER 15

C.-O. Ng 1639 A note on the Aris dispersion in a tube with phase exchange and reaction

E. A. S. Marcus and **D. A. Tarzia** 1651 Explicit solution for freezing of humid porous half-space with a heat flux condition

A. Achiq and **J. K. Naciri** 1667 Linear instability in the near wake of channels cascade

E. Baesu and **J. Casey** 1677 A treatment of internally constrained elastic–plastic materials

A. J. Chamkha 1699 Thermal radiation and buoyancy effects on hydromagnetic flow over an accelerating permeable surface with heat source or sink

M. Oda and **K. Iwashita** 1713 Study on couple stress and shear band development in granular media based on numerical simulation analyses

O. P. Bhutani and **K. Singh** 1741 On certain exact solutions of a generalized K-dV-Burger type equation via Isovector method – I

1755 Book review

NUMBER 16

A. Chrysochoos and **H. Louche**	1759	An infrared image processing to analyse the calorific effects accompanying strain localisation
W. Hussain and **R. W. Ogden**	1789	Reflection and transmission of plane waves at a shear-twin interface
M. S. Wu	1811	Exact solutions for a wedge disclination dipole in a transversely isotropic bimaterial
H. Volkan Ersoy	1837	MHD flow of an Oldroyd-B fluid due to non-coaxial rotations of a porous disk and the fluid at infinity
M. A. Ezzat and **M. I. A. Othman**	1851	Thermal instability in a rotating micropolar fluid layer subject to an electric field

NUMBER 17

P. Shevchuk, B. Galapats and **V. Shevchuk**	1869	Mathematical modelling of ageing and lifetime prediction of lacquer-paint coatings in sea water
Y. T. Zhang and **Y. B. Fu**	1895	A micromechanical model of woven fabric and its application to the analysis of buckling under uniaxial tension. Part 1: The micromechanical model
H. S. Takhar, R. Bhargava, R. S. Agrawal and **A. V. S. Balaji**	1907	Finite element solution of micropolar fluid flow and heat transfer between two porous discs
H. Demir and **F. T. Akyıldız**	1923	Unsteady thermal convection of a non-Newtonian fluid
E. Pan and **F. G. Yuan**	1939	Three-dimensional Green's functions in anisotropic piezo-electric bimaterials
J. Cao and **G. Ahmadi**	1961	Gas–particle two-phase turbulent flow in horizontal and inclined ducts
R. Kh. Zeytounian	1983	An asymptotic derivation of the initial condition for the incompressible and viscous external unsteady fluid flow problem

NUMBER 18

J. Y. Li	1993	Magnetoelectroelastic multi-inclusion and inhomogeneity problems and their applications in composite materials
B. Singh	2013	A note on energy flux in micropolar elastic waves
J. Jędrysiak	2023	On vibrations of thin plates with one-dimensional periodic structure
J. C. Misra and **S. K. Ghosh**	2045	Flow of a Casson fluid in a narrow tube with a side branch

A. G. Kolpakov 2079 Homogenized model for plate periodic structure with initial stresses

A. P. S. Selvadurai 2095 The indentation of a precompressed penny-shaped crack

2113 Book review
